

## Bulgarian Urban Art activities

During the second term in the second year of the project we learned about urban art and were introduced to its origin, different techniques and artists.

First we started collecting pictures representing Sofia Urban Art. Then we exchanged them and prepared PowerPoints for our resource banks. Every week we had a session on urban art and learned about it. We developed three lessons on the topic. The first one was called "Umbrellas Installation" and was inspired by a famous artist with a Bulgarian origin, called Christo Javasheff. Here are some pictures.

Our second lesson and work of art was called "Paper Birds". This lesson we also performed in Slovenia in front of Slovenian and Hungarian Children. We wrapped trees and fences with the colorful birds.

Our third lesson was together with New Bulgarian University and their artist Deyan Kostov and we learned and produced graffiti.

We presented our work at the mobility in Ljubljana, Slovenia from 29 May to 4<sup>th</sup> June and had a great time there learning and meeting friends from five other partnering countries.
